Sales Marker – AI Take-Home Assignment

Thank you again for your interest in the AI roles here at Sales Marker!

As the first step in our interview process, we'd like to ask you to complete a take-home assignment. You can find the project details here:

https://www.notion.so/sales-marker/Project-City-Information-Assistant-211fc2588e9e80e687bfe0a088783015

A few notes:

- You're welcome to use AI tools and libraries as you see fit.

- What we care about is that the **implementation works**, the **code is clean and readable**, **tests are in place**, and you're able to **upscope or downscope** the solution as needed.

Please complete the assignment on GitHub and share the repository link with us once it's ready. We ask that you try to submit it within **5 business days**.

Lastly, we also want to give you a quick heads-up on what to expect next:

1. **Take-Home Assignment** – this step. Once submitted, our engineers will review your work, and we'll proceed to the next step if the feedback is positive.

2. **First Interview** – a technical discussion with two of our AI Engineers, focusing on your take-home assignment and your overall AI expertise.

3. **Second Interview** – a deeper dive into your experience with the Hiring Manager, where we'll explore the scope of work you've done, leadership experience, and how your background aligns with the team's goals.

4. **Final Interview** – with our CTO, who will assess technical depth, cultural fit, and your interest in working in a fast-paced startup environment.

Best of luck — we look forward to seeing your work!

Best regards,

Sales Marker Talent Acquisition Team
